C-TPAT AND TRADE COMPLIANCE AUDIT AT GLOBE ELECTRIC 2011

Dear Thérèse

Thank you for the audit reports you offered us last September after so many months of hard work and support to our personnel.

It is important to acknowledge not only the professional quality that you and your associates offered us; by themselves your two reports were exceptional in content. Most important for Globe, your reports were well-tailored to meet the needs of our business operations in a global trade environment.

Even when our limited resources delayed your work schedule, your team was always most cooperative and dynamic. That your reports were delivered within both operational and financial objectives is an additional testimony to your team's dedication.

As you know, we were audited in October and November by our U.S. CBP Supply Chain Security Specialists who were satisfied by all we had prepared for their visits which would not have been possible without your team's support. We were re-validated in our C-TPAT Level II with the 'best of class' elements you introduced. From our CBP officers, this qualification for a Canadian company in our trade is truly exceptional.

Thank you again and you can be sure that we'll call on you again in the coming months as well as recommend your work to all our trade partners.

Very best regards,

Pierre Mallette
director of logistics
